

Marvellous Posu

Senior Full Stack Engineer

Lagos, Nigeria (Remote-ready) | +234 905 550 9623 | posumarvellous@gmail.com | LinkedIn/marvellous-posu | GitHub/dornmarv

Senior Full Stack Engineer, 7 years across fintech, Web3 and AI. Owns 10+ NestJS microservices serving 13,946 users and 281 paying customers, and shipped a fully on-chain P2P marketplace to \$2.5M+ TVL. Writes escrow, token and staking contracts in Solidity and Rust. Deep in TypeScript, NestJS, React/Next.js and payments.

WORK EXPERIENCE

Thelix Holdings, Hybrid — Senior Full Stack Engineer

JAN 2026 - PRESENT

AI career platform (Lightforth) and AI sales copilot (Cosella).

- Built and own an autonomous job-application engine that has submitted 11,000+ applications at a 70% success rate across 27 ATS platforms — Playwright browser pool on BullMQ and Redis, LLM-answered custom questions, captcha handling and attempt-level observability.
- Own backend across 10+ NestJS microservices serving 13,946 users and 281 paying customers, sustaining delivery through an engineering contraction from 20 people to 2.
- Designed the pay-as-you-go monetization stack: token-aware AI billing, credit gates, upgrade proration, hardened Stripe webhooks and Flutterwave V2 for the Nigerian market.
- Built Cosella end to end: the API from commit zero (NestJS modular monolith, transactional outbox and audit spine, Stripe Connect with installment recovery, Twilio, OpenAI Realtime copilot) plus the dashboard, admin console and Electron desktop app.

DexPay, Remote — Senior Full Stack Engineer

JAN 2023 - DEC 2025

Decentralised peer-to-peer exchange.

- Architected a fully on-chain P2P marketplace across EVM and non-EVM chains (BSC, Solana, Tron, Hedera), writing the on-chain escrow contract in Solidity and Rust; secured a \$70K+ grant.
- Built the Next.js frontend and multi-wallet onboarding for 150+ wallets, reaching \$2.5M+ TVL and 5,000+ active users, plus NestJS/MongoDB services for pricing, settlements and monitoring.

Syarpa, Remote — Full Stack Engineer

JUN 2021 - DEC 2022

- Early engineering team on a cross-border remittance app with fiat and crypto wallets that helped secure \$500K in funding; led 3 engineers modernizing dashboards with Next.js and TypeScript.

Intercity, Lagos, Nigeria — Senior Frontend Engineer

JAN 2021 - MAR 2021

- Built core booking components for Nigeria's largest bus-ticketing platform, onboarding 100+ operators, and an admin dashboard for 1,000+ daily users.

Physiona — Full Stack Engineer

JUN 2020 - JAN 2021

- Built Nigeria's first tele-physiotherapy platform (MERN) with secure video consultations, scheduling, and payments.

Protech Advance, Lagos, Nigeria — Full Stack Engineer

APR 2019 - SEP 2019

- Built pricing and rider-matching algorithms for a dispatch platform serving 10,000+ users and 1,000+ daily rides; led the legacy migration to DigitalOcean.

SKILLS

Backend: Node.js, NestJS, Express, MongoDB, PostgreSQL, Redis, Kafka, BullMQ, REST, GraphQL, WebSockets, Microservices, JWT/OAuth

Web3 & Blockchain: Solidity and Rust, escrow / token / staking smart contracts, Hardhat, Truffle, Anchor, EVM and non-EVM chains (Ethereum, BSC, Polygon, Solana, Tron, Hedera), Ethers.js, Web3.js, Viem, Wagmi, on-chain escrow, crypto-fiat on/off-ramp

Frontend: TypeScript, React, Next.js, Redux Toolkit, RTK Query, TanStack Query, Tailwind CSS, Radix UI, Electron, Vite

AI & Automation: OpenAI (incl. Realtime), Anthropic Claude, LangChain, LLM agents, Playwright, Puppeteer, web scraping at scale

Payments: Stripe + Stripe Connect, Flutterwave, Paystack, PayPal, Twilio, webhook hardening, idempotent money movement

DevOps & Testing: Docker, GitHub Actions, Nginx, DigitalOcean, Sentry, OpenTelemetry, Jest, Cypress, integration harnesses

EDUCATION & LANGUAGES

Obafemi Awolowo University — B.Sc. Computer Science | English (Fluent, IELTS 8.0), French

NOV 2013 - JUN 2019
