

Marvellous Posu

Senior Full Stack Engineer

Lagos, Nigeria (Remote-ready) | +234 905 550 9623 | posumarvellous@gmail.com | LinkedIn/marvellous-posu | GitHub/dornmarv

Senior Full Stack Engineer with 6+ years building fintech, AI, and Web3 products. Owns 10+ NestJS microservices behind an AI career platform serving 13,946 users, including an autonomous engine that has submitted 11,000+ job applications across 27 ATS platforms at a 70% success rate. Deep in TypeScript, NestJS, React/Next.js, LLM integration, and payments.

WORK EXPERIENCE

Thelix Holdings, Hybrid — Senior Full Stack Engineer

JAN 2026 - PRESENT

AI career platform (Lightforth) and AI sales copilot (Cosella).

- Built and own an autonomous job-application engine that has submitted 11,000+ applications at a 70% success rate — headless browsers (Playwright, BullMQ pool, Redis) driving 27 ATS platforms (Workday, Greenhouse, Lever, Ashby, iCIMS, Oracle, ADP), with LLM-answered screening questions, captcha solving, and per-attempt observability. Originated it as a weekend prototype after a third-party approach failed.
- Own backend across 10+ NestJS microservices serving 13,946 users and 281 paying customers, sustaining delivery through an engineering contraction from 20 people to 2.
- Designed the pay-as-you-go monetization stack — token-aware AI billing, credit gates, upgrade proration, hardened Stripe webhooks, and Flutterwave V2 for the Nigerian market — supporting \$16.6K and ₦1.43M in processed revenue.
- Built the job aggregation service solo: crawlers across 10 ATS job boards with fingerprint deduplication, curated matching, and a prioritized recency-sorted delivery queue.
- Built Cosella end to end: the API from commit zero (NestJS modular monolith, transactional outbox and audit spine, Stripe Connect with installment recovery, Twilio voice/SMS, live copilot over OpenAI Realtime) plus the dashboard and Electron desktop app — owning every client-to-service integration across the product.

DexPay, Remote — Senior Full Stack Engineer

JAN 2023 - DEC 2025

Decentralised peer-to-peer exchange.

- Architected a fully on-chain P2P marketplace across EVM and non-EVM chains (BSC, Solana, Tron, Hedera); secured a \$70K+ grant.
- Built the Next.js frontend and multi-wallet onboarding for 150+ wallets, reaching \$2.5M+ TVL and 5,000+ active users, plus NestJS/MongoDB services for pricing, settlements, job queues, and monitoring.

Syarpa, Remote — Full Stack Engineer

JUN 2021 - DEC 2022

- Early engineering team on a cross-border remittance app with fiat and crypto wallets that helped secure \$500K in funding; led 3 engineers modernizing dashboards with Next.js and TypeScript.

Intercity, Lagos, Nigeria — Senior Frontend Engineer

JAN 2021 - MAR 2021

- Built core booking components for Nigeria's largest bus-ticketing platform, onboarding 100+ operators, and an admin dashboard for 1,000+ daily users.

Physiona — Full Stack Engineer

JUN 2020 - JAN 2021

- Built Nigeria's first tele-physiotherapy platform (MERN) with secure video consultations, scheduling, and payments.

Protech Advance, Lagos, Nigeria — Full Stack Engineer

APR 2019 - SEP 2019

- Built pricing and rider-matching algorithms for a dispatch platform serving 10,000+ users and 1,000+ daily rides; led the legacy migration to DigitalOcean.

SKILLS

Backend: Node.js, NestJS, Express, MongoDB, PostgreSQL, Redis, Kafka, BullMQ, REST, GraphQL, WebSockets, Microservices, JWT/OAuth

Frontend: TypeScript, React, Next.js, Redux Toolkit, RTK Query, TanStack Query, Tailwind CSS, Radix UI, Electron, Vite

AI & Automation: OpenAI (incl. Realtime), Anthropic Claude, LangChain, LLM agents, Playwright, Puppeteer, web scraping at scale

Payments: Stripe + Stripe Connect, Flutterwave, Paystack, PayPal, Twilio, webhook hardening, idempotent money movement

DevOps & Testing: Docker, GitHub Actions, Nginx, DigitalOcean, Sentry, OpenTelemetry, Jest, Cypress, integration harnesses

EDUCATION & LANGUAGES

Obafemi Awolowo University — B.Sc. Computer Science | English (Fluent, IELTS 8.0), French

NOV 2013 - JUN 2019
